line3

Here's some example text for reference -

Que. 1

How do I create a question tag like this?

Ans.

Tags "Que." and "Ans." are keywords that are automatically shifted on the left side of the margin. Important - Don't forget to move to the next line Enter after using these tags.

Que. 2

How do I create a numbered list?

Ans.

If the first thing to appear in a line is a number it is automatically shifted to the left of the margin.

2.0 If you don't want the first character to shifted -

2.2) Add a "I" before the number, Example -

1500 lines of code are behind this software (website excluded)

1|500 lines of code are behind this software (website excluded)

Que. 2

What are the mathematical features available?

Ans.

Example - $10^2 + 100^{(-12/13)}$ $E=mc^2$

You can explore the "Example" section for more examples about what all can be done!
